Appeal Under Section 4 of Khyber Pakhtun Khwa
Service Tribunal Act 1974 against the impugned transfer
office order No. SOH-III/7-262/2020 dated 30/03/2020
and order dated 19/05/2020 passed by respondent No.1.

PRAYER IN APPEAL:

Filed to-day

Registrar

6/7/2020

On acceptance of the instant service appeal the
impugned transfer office order dated 30/03/2020 &
order dated 19/05/2020 passed by respondent No.1 may
kindly be set aside and declare violative of law, rules
and based on mala fide and political pressure and the
appellant may kindly be retain on his present post at
Swat.

Any other relief being fit in the circumstances of the
case may also be granted in favor of appellant in the
best interest of justice.

Respectfully Sheweth:

The appellant submits as under.

1. That, the initially the appellant joined the respondent department since long and as such performing his duties accordance with law and rules with honesty.
2. That* prior the impugned order appellant was posted as Senior Drug Inspector BS-18 District Swat against the vacant post vide order dated 30/10/2019 and as such the appellant joined his duty and kept his service continue. (copy of office order dated 30/10/2019 is attached as annexure A)
3. That the appellant continued his service and after a short period of 5 months the respondent No.1 transferred the appellant to Directorate General Drug Control and Pharmacy services Khyber Pakhtunkhwa Peshawar on dated 30/3/2020.(copy of transfer order dated 30/03/2020 is attached as annexure B)
4. That respondent No.1 while acting mala fide issued transfer order of appellant vide notification No. SOH-III/7-262/2020 dated 30/03/2020. The premature transfer of appellant after such a short period clearly shows mala fide intention of respondent No.1 towards the appellant.
5. That after the impugned order passed by respondent No.1, the appellant filed a departmental

appeal before the competent authority, but the competent authority kept appellant in waiting and assured appellant for the disposal of the same soon. (copy of departmental appeal is attached as annexure C)

6. That the appellant then submitted the cancellation of the impugned transfer office order dated 30/03/2020 to respondent No.1 in this regard but in vain and the respondent No.1 dismissed the same through order dated 19/05/2020 and the same was received to appellant on 15/06/2020. (copy is attached as annexure D)
7. That being aggrieved from the impugned order / notification No. SOH-III/7-262/2020 dated 30/03/2020 by respondent No.1, the appellant has got no other remedy except to knock the door of this August Court, and the same is liable to be set aside on the following amongst other grounds.

Grounds:

- a) That the impugned transfer order is against the law and policy, hence untenable, unjust and unfair.
- b) That the appellant was not treated in accordance with law and rules. Thus, acted in violation of the relevant laws and policy laid down for the purpose.

- c) That the appellant has been treated discriminatory and with ill intention because of his rapid transfer within a short period of time, thus this action of respondent No.1 is itself illegal, untenable, and against the law and rules.
- d) That appellant is permanent resident of District Swat and is a patient of cancer and diabetes and undergone treatment of Chemotherapy, which has already affected appellant's lungs severely. (copies of the chemotherapy and diabetes treatment is annexed as annexure E)
- e) That the parents of the appellant are of old age, specially the appellant's father who is the patient of chronic Dementia. The appellant being the youngest son and only caretaker of the appellant parents.
- f) That under such a circumstances when the whole world, country and province of KP is under locked down situation and the appellant being a patient of cancer will not be able to perform his official duties in other districts, especially under treatment of chemotherapy, diabetes with lungs sensitivity. Which are more vulnerable to Covid-19 pandemic infection.
- g) That the appellant in the existing prevailing situation in the area adjusting the appellant in his own District, is an act supported by transfer and posting policy rules in the interest of justice.

- h) That so far no substitute Drug Inspector has not yet been posted/ transfer at Swat and the post of Drug Inspector is still vacant and thus the innocent people of District Swat have been left on mercy of illegal and spurious drugs sellers/ manufactures.
- i) That the issuance of the impugned orders in such short span of time the appellant was not allowed to complete his tenure and such like discriminatory and based on the mala fide order clearly shown the ill intention of respondent No.1 towards the appellant.
- j) That the impugned transfer order clearly shows the ill intention of respondent No .1 by taking such like illegal action and inaction over classical example of political victimization because the appellant was indirectly penalized by way of transfer from one place to another and such like discriminatory attitude of respondent No.1 compels the appellant to knock the door of this August Tribunal for justice.
- k) That any other grounds not specifically raised shall be argued at the time of arguments with the leave of this Honorable Service Tribunal.

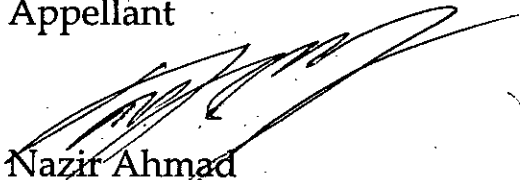

It is therefore, humbly requested that on acceptance of the instant service appeal the impugned transfer office order dated 30/03/2020 & order dated 19/05/2020 passed by respondent No.1 may kindly be set aside

6

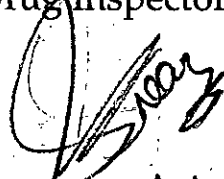

and declare violative of law, rules and based on mala fide and political pressure and the appellant may kindly be retain on his present post at Swat.

Any other relief being fit in the circumstances of the case may also be granted in favor of appellant in the best interest of justice.

The Honourable Secretary Health
Govt: of KPK Health Department Peshawar.

L.No. 5008
Date 20/4/2020
Secretary Health

Through Proper channel.

Subject:- APPEAL/REQUEST FOR CANCELATION OF TRASFER ORDER.

Respected Sir,

A.O.A.

Reference is made to Notification transfer Order No. SOH-III/7-262/2020 Dated 30-03-2020.

In this connection I have the honour to state that:-

I am serving as Senior Drugs Inspector in District Swat and am responsible citizen and gazetted Officer, BPS-18, appointed under Section 17 of The Drugs Act 1976.

Respected Sir, you will appreciate to know that a being a Senior Drugs Inspector, I always stand to perform my duties interested upon me under the relevant provisions of the said Act & Rules made thereunder, keeping in mind the spirit of Section 37 of the said Act emphasizing on every Drugs Inspector job to be that of a Public Servant.

Respected Sir, you will also appreciate to know that the nature of my job demands action against violators of the Drugs Act 1976 across the board, in dispensation of which emergence of grievances of the stake holders can neither be ruled out nor it would beyond any comprehension, particularly in time when the whole State machinery is geared up in tackling/combating the Covid-19 outbreak and the competent authority has given nod to the Drugs Control KP for taking stringent action against holders and those involved in the illegal price hikes of personal protective equipments.

Respected Sir, A baseless & groundless complaint may have been reported to your goodself against me on 28-03-2020.

Respected Sir, I had been patient of Cancer and Diabetes and under gone treatment of Chemotherapy, which has already affected my lungs severely and therefore, I am more vulnerable to the recently epidemic corona virus.

My parents are of old ages, especially my father, who is a patient of Diabetes and chronic Dementia, lost his memory and on several time goes out of home daily. I am his youngest son and the only care provider to them.

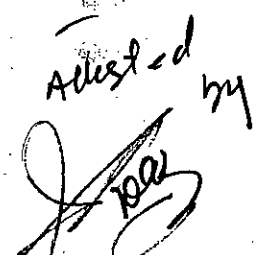

Under such a circumstances when the Whole Country and Province is under locked down situation, being a patients of cancer will not be able to perform my Official duties in other Districts, especially under treatment of chemotherapy and Lungs sensitivity which are more vulnerable to Covid -19 pandemic infection

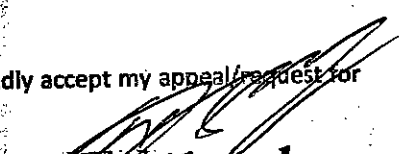

Sir, Moreover in this panic situation due to outbreak of Covid-19, my transfer Order /Notification seems to have been done in hurry and without hearing and proper fact finding. I am already susceptible to Corona Pandemic after chemotherapy. Movement from village to Village and District to District is restricted. No public transport is available, in this situation I am unable to do my duty in another District.

Sir, How I will find residence in Peshawar in this panic situation. Sir, your goodself is requested to take necessary action.

Keeping in view the above actual facts, it is, therefore, humbly requested to kindly accept my appeal/request for cancelation of my transfer order. I shall be very thankful to you and oblige.

Regard.

Chemotherapy Information Instructions

The diagnosis, prescribed treatment plan, intent of treatment, its associated benefits, risks, alternative treatment including no treatment and the likelihood of success have been explained to you/your parent/guardian/family members as part of consent process. Please note the following information in addition.
 Most of the chemotherapy side effects shall recover in 1-2 weeks.
 It is important to take a healthy diet/drink plenty of water and maintain good personal hygiene.
 In case of following symptoms, immediately seek medical advice/Report to emergency department.

- 1- Fever > 38°C
- 2- Cold/shivering without high temperature
- 3- Mouth ulcers affecting your oral intake
- 4- Loose motion > 7 times a day, Persistent vomiting/Abdominal Pain
- 5- Irregular heartbeat /chest pain or breathing difficulty
- 6- Dizziness/light headness and Seizures
- 7- Bruising/Bleeding from any site

In case of acute emergency, you may require urgent evaluation at nearest hospital in your area. Do not delay treatment in an effort to get to Shaukat Khanum Hospital.

Please report at chemotherapy counter at least half an hour before your given appointment.
 Kindly get the blood tests as advised at least 24 to 48 hours prior to chemotherapy.

Interpretation:

NORMAL SPIROMETRIC VALUES indicate the absence of any significant degree of obstructive pulmonary impairment and/or restrictive ventilatory defect.
 Lung volume testing was performed by body plethysmography.
NORMAL LUNG VOLUME VALUES indicate the absence of any hyperinflation, air trapping, or restrictive process.
 The diffusing capacity test results are adjusted to account for the actual haemoglobin present.
NORMAL DIFFUSING CAPACITY. This is indicated by the finding of normal values for both the diffusing capacity (DsbHb) and the diffusing capacity in relation to the lung volume (D/VAsbHb).
 This interpretation is valid only upon doctor review and signature.

Serology - Infections

SPECIMEN : SERUM

TEST(s)	RESULT(s)	CUT- OFF VALUE	
Anti HIV	Non-Reactive	Cutoff rate:	1.00
		Patient Rate:	0.08

COMMENTS:

Anti HIV is a Chemiluminescent Immuno Assay for the simultaneous qualitative detection of HIV p24 antigen and antibodies to human immunodeficiency virus type 1 and/or type 2 in human serum.
Please note that this is a screening test and should be confirmed by using confirmatory molecular tests such as PCR.

Serology - Hepatitis

SPECIMEN : SERUM

TEST(s)	RESULT(s)	CUT- OFF VALUE
Anti HCV	Non-Reactive	Cutoff rate: 1.00 Patient Rate: 0.33

COMMENTS:

Anti HCV is a chemiluminescent microparticle immunoassay for the qualitative detection of IgG antibody to hepatitis C virus in human serum. This is a screening test. If there is a non-reactive HCV Antibody result but recent HCV exposure is suspected, then do follow-up testing for HCV antibody to demonstrate seroconversion (average of 8 to 9 weeks) and test for HCV RNA. A non-reactive HCV Antibody result does not exclude the possibility of exposure to or infection with HCV. Non-reactive test results in individuals with prior exposure to HCV may be due to low Antibody levels that are below the limit of detection of this assay. A reactive HCV antibody result indicates either current HCV infection, past HCV infection that has resolved or false reactivity. A reactive result should be followed by HCV RNA testing. If HCV RNA is detected, that indicates current HCV infection. If HCV RNA is not detected, that indicates either past or resolved HCV infection or false HCV antibody reactivity. False reactive results can be obtained with heterophilic antibodies in serum, especially in patients routinely exposed to animals. Also cross-reactivity with other viral infections and diseases is possible leading to false reactive HCV Antibody results. Reference: Centers for Disease Control and Prevention. Testing for HCV infection: an update of guidance for clinicians and laboratorians. MMWR Morb Mortal Wkly Rep. 2013 May 10; 62 (18): 362-5.

METHOD:

Test is performed on Architect instrument employing chemiluminescent microparticle immunoassay (CMIA).

Tumor Markers

SPECIMEN : SERUM

TEST(s)	RESULT(s) UNITS
Beta HCG Free	< 2 ng/mL

Comments:

Measurements of beta HCG free level have been found to aid in the diagnosis and monitoring of trophoblastic diseases (moles, choriocarcinoma) and certain testicular tumors. Application in diagnosis and monitoring of tumor recurrence requires high sensitivity in the assay's low end, and careful interpretation is required. Lower reportable limit of the assay is 2 ng/mL. Value below 2 ng/mL requires serial monitoring to detect increase in the free beta HCG.

CPT : ULTRASOUND (SCROTAL)

HISTORY : left testicular mass and hydrocele as per OSH ultra sound hospital

REPORT : Scrotal ultrasound has been performed:

Right testis demonstrate normal parenchymal echotexture with no focal lesion. On dopper scan normal vascularity is seen. It measures 42 x 18 x 33 mm and has a volume of 13.2 mL. Ipsilateral epididymis outlines normally. No hydrocele or varicocele.

Left testis is enlarged with near complete replacement of parenchyma with hypoechoic lesions. Ipsilateral epididymis also appears involved. Internal vascularity is noted on doppler scan. Left testis measures 58 x 38 x 45 mm and has a volume of 51.7 ml. Mild to moderate hydrocele is noted.

Bilateral inguinal recess show no suspicious lymph nodes.

CONCLUSION : Enlarged left testis with hypoechoic lesions replacing normal parenchyma is concerning for malignancy. Biochemical and urgent urological consultation is advised.

CPT : CT CHEST, ABDOMEN AND PELVIS WITH CONTRAST

HISTORY : left testicular mass ,ultra sound also shows para aortic lymph nodes enlargement..CT is to exclude visceral and lymphatic mets

REPORT : CT scan examination of the chest, abdomen and pelvis. This is a baseline CT scan.

Findings:

There is a prominent left supraclavicular lymph node measuring 14 x 8 mm. No evidence of enlarged mediastinal lymph nodes. Bilateral hilar nodal stations are clear. There is no pleural or pericardial effusion. No metastatic pulmonary nodule is seen. No endobronchial mass lesion is identified. Multiple enlarged metastatic retroperitoneal lymph nodes within the para-aortic nodal recesses largest individual lymph node measuring up to 2.6 x 2.9 cm in left para-aortic station. Small left common iliac territory lymph nodes. Subcentimetre pelvic sidewall lymph nodes. Inguinal nodal stations are clear. No metastatic liver lesion. Spleen, pancreas, biliary system, adrenals and kidneys are within normal limits. There is no ascites. No metastatic osseous lesion within the visualised skeleton.

CONCLUSION : Enlarged pathological left supraclavicular and retroperitoneal metastatic nodal disease. No visceral metastases seen.

Tumor Markers

SPECIMEN : SERUM

TEST(s)	RESULT(s) UNITS
Beta HCG Free	< 2 ng/mL

Comments:

Measurements of beta HCG free level have been found to aid in the diagnosis and monitoring of trophoblastic diseases (moles, choriocarcinoma) and certain testicular tumors. Application in diagnosis and monitoring of tumor recurrence requires high sensitivity in the assay's low end, and careful interpretation is required. Lower reportable limit of the assay is 2 ng/mL. Value below 2 ng/mL requires serial monitoring to detect increase in the free beta HCG.

Tumor Markers

SPECIMEN : SERUM

TEST(s)	RESULT(s) UNITS
Beta HCG Free	< 2 ng/mL

Comments:

Measurements of beta HCG free level have been found to aid in the diagnosis and monitoring of trophoblastic diseases (moles, choriocarcinoma) and certain testicular tumors. Application in diagnosis and monitoring of tumor recurrence requires high sensitivity in the assay's low end, and careful interpretation is required. Lower reportable limit of the assay is 2 ng/mL. Value below 2 ng/mL requires serial monitoring to detect increase in the free beta HCG.
