**6.3.16 Monitoring and Evaluation:**

**6.3.16(i) Departmental Monitoring:**

Monitoring is vital for successful launching and meeting the objectives of the Billion Trees Afforestation Program. Monitoring of the project activities will be carried out through three tiered monitoring i.e. at department, project and third party levels (external)

Under departmental monitoring there will be following mechanism;

- All the activities will be marked on GIS maps and the coordinates for the planned field activities will be provided by the field staff to the PMU before undertaking physical work.
- The SDFO/RFO will supervise the work and shall be responsible for 100% correctness.
- The DFO will supervise work and shall be responsible for 50% correctness, after proper monitoring and verification.
- The DFO concerned will also ensure that compartment history file is maintained having map of plantation, pre, during and post work photographs of the area, quality and quantity of work done, GPS coordinates record of the area and updation of history files.
- The Conservator of Forests of the concerned Forest Circles will physically monitor and verify the 30% work to satisfy correctness of work in his area of jurisdiction. Further, he has to ensure that duties of DFO regarding developmental works are fulfilled, gaps identification and course correction accordingly.
- The Chief Conservator of Forests of the Region has to ensure policy coherence regarding project concept and guide the field staff on course correction. For this purpose, he will randomly check 10% of the activities for evaluating the quality and quantity of work in order to buildup guidelines for necessary corrective measures.

The Forestry Planning and Monitoring Circle (FP&M) to deliver the following activities:

- Establish baseline in forest and non-forest areas for the project using satellite imageries.
- Database establishment in MS ACCESS program encompassing the details of Plantation Journals and Nursery Journals (History files) of all areas to be monitored. Details such as natural regeneration, pit size, density and area covered through plantation in buffer zone, wastelands and farmlands.
- Carrying out 50% monitoring of all gone over works

Project will also monitor activities through its own three monitoring officers:

- The M&E Officers will carry out monitoring regularly in their regions, keep PD abreast of activities and suggest improvement measures for keeping the project in the right direction.
- Provide inputs to PMU on ToR's development for external monitoring & evaluation, delineating functions for external validators and MOU signing.
- Monitoring through GIS/RS, fixed point photography (Pre, during and post activity) and physical verification through surveys using GPS.
- Build capacity of the field staff in monitoring
- Development of Maps for areas monitored showing details of activities.
- Compilation of monitoring reports containing suggestions on course correction for area managers as well as forwarding remedial measures to steering committee.
- Liaise with external valuator, facilitating them in providing data and information sharing on developmental activities carried out under the project.

The Planning Officer (Head Quarter) will provide complete quarterly monitoring report from the data and information collected from the Regional Monitoring Officers and Forestry Planning and Monitoring Circle.
