### CT Scan of the Brain & Orbits.

#### Scanning Protocol:

Axial and coronal images were obtained after intravenous contrast.

#### Findings:

There is no evidence of abnormal signal in brain to suggest intracranial bleed, mass or gross area of infarction.

The ventricles are of normal size.

There is no midline shift.

The vestibulo-cochlear nerve complexes are normal.

The sella, pituitary gland and cavernous sinuses are normal.

Both eyeballs appear normal with no evidence of any mass. There is no evidence of intraconal or extraconal mass.

The extraocular muscles are normal on either side.

The retrobulbar region, the optic nerves and the vascular structures are unremarkable.

The pituitary gland appears normal with no evidence of any mass.

Included sections through the paranasal sinuses show evidence of complete opacification of the maxillary, the ethmoid and the frontal sinuses bilaterally.

These changes are consistent with sinonasal polyposis.

Evidence of previous surgery within the nasal septum with resection of the middle turbinates and the inferior turbinate on the right side as well as partial resection also noted of the midline septum.

Mild hypertrophy of the inferior nasal turbinate on the left side is seen.

#### Conclusion

Normal CT examination of the brain and orbits.

Evidence of previous surgery within the nasal septum with resection of the middle turbinates and the inferior turbinate on the right side as well as partial resection also noted of the midline septum.

Mild hypertrophy of the inferior nasal turbinate on the left side is seen.

## REPORT

### CTSCAN PARA NASAL SINUSES WITHOUT CONTRAST:

- There is evidence of heterogeneously enhancing polypoidal mucosal thickening involving both the maxillary sinuses, frontal, ethmoid and sphenoid sinuses. It is causing widening and blockage of osteomeatal complexes bilaterally. This mucosal thickening is also extending into the nasal cavity resulting in its opacification more on left side. There is thinning and remodeling of the bony septa of ethmoid, nasal septum, cribriform plate and medial wall of maxillary sinus. Lamina papyracea bowed laterally however there is no evidence of erosion.
- Few hyperdense areas seen in bilateral ethmoid cells on plain study.
- Few small subcentimeter level II lymphnodes are seen on left side.
- Imaged portion of neurocranium appears unremarkable.
- There is no evidence of intracranial or intra orbital extension.
- The pharynx and imaged para pharyngeal structures show no abnormalities.

### IMPRESSION:

- Heterogeneously enhancing polypoidal mucosal thickening involving both the maxillary sinuses, frontal, ethmoid and sphenoid sinuses. It is causing widening and blockage of osteomeatal complexes bilaterally. This mucosal thickening is also extending into the nasal cavity resulting in its opacification more on left side. There is thinning and remodeling of the bony septa of ethmoid, nasal septum, cribriform plate and medial wall of maxillary sinus. Lamina papyracea bowed laterally however there is no evidence of erosion.
- Findings are suggestive of Sino nasal polyposis with possible fungal superimposition.
- Needs clinical correlation for further evaluation.

جناب عالی ؟

موردانہ نذرش ہے کہ سائل کا آرڈر نمبر 752/10 جو کھیدار آپ سے پاس ملازم ہے۔  
 سائل کی ڈیٹی کے دوران اچانک طبیعت خراب ہوئی تھی۔ سائل قحافی دفتر میں درخواست  
 دے کر ڈاکٹر کے پاس چلا گیا تھا۔ ڈاکٹر نے ہسپتال میں داخل کر دیا۔ علاج کے دوران سائل کی  
 طبیعت زیادہ خراب ہوئی۔ اور ڈاکٹر نے امیسیشن کرنے کا حکم دے دیا۔ امیسیشن کے دوران اچانک  
 میری آہ آتکھ کی نظر ختم ہوئی کافی عرصہ علاج کے بعد کھوڑا بہت افاقہ ہوا۔ 2008 میں دفتر میں  
 حاضری دی جہاں میں ڈیٹی سرانجام دیا تھا۔ نکتیاً علی والوں نے کہا کہ آپ کی تنخواہ بند ہے آپ پشاور دفتر  
 میں حاضر ہوں۔ میں دفتر میں آتا تو دفتر والے بتے جو ماہ کے بعد یہ نہ کرنا کہو جب میں حاضر ہوتا تو  
 15 دن بعد کا لہہ دیتے۔ جناب عالی۔ میرا جو ماہ بعد آہ منے بعد آنا جانا گوارا رہا۔  
 لیکن دفتر والوں نے کوئی بھی میرے ساتھ تعاون نہیں کیا۔

آخر کار میں نے سکریٹری صاحب کے پاس درخواست جمع کرائی۔ جس کا D.No 5702 دفتر والوں سے پاس بھیجی  
 جناب عالی :- سکریٹری صاحب نے جو درخواست بھیجی اس کا بندہ کہنے جب میں دفتر میں آیا تو دفتر والے بتے  
 میں نے آپ کی درخواست F.O.A کے پاس بھیج دی ہے۔ کافی عرصہ نہر کھایا جناب عالی میری اس  
 درخواست پر کوئی عمل در آمد نہیں ہوا۔ کبھی کہتے ہیں دفتر والے آپ کی سروس ٹب نہیں ملتے ہیں  
 جناب عالی - سروس ٹب کی ذمہ داری دفتر والوں کی ہوتی ہے میری ذمہ داری تو نہیں ہے  
 جناب عالی۔ میری آپ سے نذرش ختم ہے۔ میں بہت غریب آدمی ہوں میرا بانی کہے میری تنخواہ جاری کر دیں  
 میں آپ کا ساری زندگی دعا گو رہتا ہوں۔

19.05.2022

Learned counsel for the appellant present.

Learned counsel for the appellant contended that the appellant was initially appointed as Chowkidar on contract basis on 20.04.2004 whose services were regularized w.e.f. 01.04.2006. The appellant was sick and his pay was stopped. On a question to produce original impugned order of the competent authority or appellate order to have been issued by the appellate authority, learned counsel for the appellant did not have any reply to substantiate his point of view. He could neither produce any evidence as impugned order nor any plausible reason to justify his claim for restoration of pay. There is no impugned or appellate order to have been annexed with the memorandum of appeal and reflected in the index appended to the service appeal. Therefore, the statutory requirement under Section 4 of the Khyber Pakhtunkhwa Service Tribunal Act, 1974 is not fulfilled. With these observations of the court, learned counsel for the appellant requested for adjournment. To come up for preliminary hearing on 18.07.2022 before S.B other than the present one.
